WingAway Weekends · Phase 1: Ready for more regions

Plan date November 3, 2026 · Next region: Mid-Atlantic & Chesapeake · Site: wingawayweekends.com

> **Goal:** make the site work for pilots anywhere in the U.S. and make adding a new region fast, without changing how the current 24 Southeast destinations look or work.

WORKSTREAMS

	WORKSTREAM	WHAT CHANGES	DONE WHEN
1	**Nationwide home airports**	Load every U.S. public airport (OurAirports, public domain), not just seven Southeast states. Kept small so the homepage stays fast.	Any U.S. airport code works on the homepage, the guides and Fly to Lunch.
2	**Destination data file**	Move the destination list out of the homepage code into one data file (region, state, airport, tags, photo, family flag).	Adding a destination is one new entry; homepage and review page both read it.
3	**Region filter & pages**	Region buttons on the homepage (Southeast now; Mid-Atlantic next), still sorted by flight time from your airport. A landing page per region for search engines.	Visitors can narrow by region; /southeast/ lists the current 24.
4	**“Traveling with kids” toggle**	A homepage toggle that shows family-friendly destinations. Start by tagging the 24; add a short “With kids” box to guides over time.	Toggle works; each destination is tagged yes or no.
5	**Wording & search cleanup**	Remove Southeast-only wording; update page titles, descriptions and the sitemap; refresh the README and notes.	Nothing on the site implies it is Southeast-only.
6	**Regional reviewers**	An invitation message, a one-page reviewer checklist (the same “lg” process) and a “Reviewed by” credit on guides.	Two or three Mid-Atlantic reviewers have said yes.

SEQUENCE

- **Step A (Claude):** workstreams 1, 2 and 5. No visible change except more airports.
- **Step B (Claude):** workstreams 3 and 4 on the homepage; family tags for review.
- **Step C (you):** merge, spot-check on phone and computer, mark family tags.
- **Step D (you + Claude):** send reviewer invitations; finalize the Mid-Atlantic list.

YOUR DECISIONS

- ☐ Region names and borders (e.g. Mid-Atlantic = VA, WV, MD, DE, PA, NJ)
- ☐ Which of the 24 are family-friendly
- ☐ Reviewer names and how they are credited
- ☐ Final Mid-Atlantic destination list

MID-ATLANTIC CANDIDATES (PICK 8–12)

- St. Michaels & Easton, MD (Easton, KESN)
- Annapolis, MD (Lee Airport, ANP)
- Cape May, NJ (KWWD)
- Gettysburg & Lancaster, PA (KLNS)
- Shenandoah & Luray, VA (KLUA)
- Chincoteague & Assateague, VA (Accomack Co., KMFV)
- Rehoboth & Lewes, DE (KGED)
- Bedford Springs, PA (KHMZ)
- The Homestead / Hot Springs, VA (KHSP)
- Greenbrier, WV (KLWB)

KEEP IN MIND

- DC SFRA, P-40 and frequent TFRs affect several Mid-Atlantic airports.
- Photo sources: NPS (public domain) and Unsplash (credit; served from Unsplash).

Hosting stays on Cloudflare Pages (free). All work lands on the “updates” branch; nothing goes live until you merge. Project notes: PROJECT_NOTES.md in the repository.
